ABOUT ME

Enthusiastic about learning advancements in deep learning and LLMs. Outside of tech, I enjoy capturing creative moments through photography.

EDUCATION

- **KJ Somaiya College of Engineering** August 2023 - August 2027
B.Tech in Computer Engineering Mumbai, India
 - CGPA: 8.85

PROJECTS

- **Gesture Scrolling: Hand Gesture Recognition for Scrolling on Android** June 2025 - July 2025
Tools: PyTorch, OpenCV, Mediapipe, Optuna, ONNX, Kotlin, Android Studio [🔗]
 - Built an Android application that provides hands-free social media navigation by interpreting user gestures from a camera feed.
 - Designed and trained a custom **Temporal Convolutional Network(TCN)** model on a self-generated dataset.
 - Leveraged **Optuna** for hyperparameter tuning to increase accuracy (**91.7% to 95.8%**) and converted the model to **ONNX** to achieve an **8.23x** increase in inference speed.
 - Developed a production-ready Android application using **Kotlin** and **Jetpack Compose**.
- **AI Powered Malware Detection and Classification System** April 2025
Tools: PyTorch, Kaggle, SciKit-Learn, NodeJS, ExpressJS [🔗]
 - Engineered a **hybrid ML model** during a 24-hour hackathon by training a **CNN** and **XGBoost** pipeline.
 - Refined a custom Python pipeline for real-time malware classification from bytecode images, gaining practical experience in full-stack integration challenges.
- **Advanced Knowledge-Based Chatbot System** July 2024
Tools: FastAPI, LangChain, JavaScript, HTML, Python [🔗]
 - Built a **knowledge-based chatbot** using **FastAPI** and **LangChain**.
 - Developed a **Retrieval Augmented Generation (RAG) Model**, using Gemma:2b on **Ollama** for generating replies.
 - Designed a system to process and store large PDF documents efficiently using **vector databases**, ensuring access to relevant information in less than **1000 milliseconds**.

EXPERIENCE

- **Data Scientist Intern** July 2025 - August 2025
Evoastra Ventures Remote
 - **Led my team** to build and deploy a web scraper for dynamic sites, handling large-scale data collection.
 - Built a comprehensive database of car information and pricing, using **Selenium** and **BeautifulSoup**.
 - Developed a CNN+LSTM image captioning model in **TensorFlow** with a BLEU score of **0.56**.
- **Associate Mentor** July 2024 - April 2025
Somaiya Machine Learning Research Association Mumbai, India
 - Delivered a hands-on ML workshop for **20+** students.
 - Explained key concepts like **Support Vector Machines (SVM)** and **K-Nearest Neighbors (KNN)**.
 - Leveraged engaging presentation skills to break down complex concepts, fostering enthusiastic participation and clearer ML understanding among attendees.
- **Web Developer** June 2024 - August 2024
KJ Somaiya College of Engineering Mumbai, India
 - Led the development of an educational website designed to guide upcoming freshers.
 - Wrote a website using **HTML**, **Bootstrap CSS**, and **JavaScript**, ensuring an interactive and user-friendly experience for learners.

SKILLS

- **Programming Languages:** Python, C++, JavaScript, HTML, CSS, Kotlin, Java, Shell, Rust, PHP
- **Web Technologies:** ReactJS, AJAX, TailwindCSS, PostgreSQL
- **Data Science & Machine Learning:** PyTorch, Lightning, TensorFlow, LangChain, NumPy, Pandas, Scikit-learn, Google-ADK, Ollama, OpenRouter

CERTIFICATIONS/ACHIEVEMENTS

- **DeepLearning.ai: Supervised Machine Learning: Regression and Classification** November 2024
- **DeepLearning.ai: Advanced Learning Algorithms** December 2024
- **IUCEE: Mastering Multi-Agent AI: Building Intelligent Collaborative System** December 2024
- **GAJSHIELD 2025:** Built a model that ranked my team in the Top 5 in GAJSHIELD Hackathon April 2025
